

Data Central is the maintenance-free enterprise restaurant management solution that enables you to turn insights into higher margins, improve operational efficiencies and lower food and labor costs!

✓ No admin needed

Our Concierge Services team can manage Data Central's entire database and execute daily administration tasks so you can take care of your customers.

Our team:

- Manages supply chain substitutions and vendor linking
- Facilitates menu changes, maintains payroll batch and job linking
- Configures, links, and monitors mundane BOH tasks to minimize errors
- Provides all training materials needed to expedite training of new staff, including in-app Tool Tips that walk users through common troubleshooting concerns

Less food waste and lower food costs

- Restaurants are serving fresher food and producing less food waste by using our Prep/Pull/Thaw/Drop Sheets to reduce food prep time by 20-30 minutes
- Our Food & Inventory module provides both menu engineering and shortens daily inventory time to <15 minutes and full inventory down to <1 hour

Cut labor costs (not staff)

- Minimize overtime and prevent over- or under-scheduling by leveraging our Suggested Scheduling Tool
- Employees have an easy-to-use self-service scheduling mobile app that optimizes time off and shift changes while giving full schedule visibility to all team members

Get full visibility into your operations

- We provide mobile-friendly, interactive, cloud-based reporting dashboards allowing you to easily access the right information anywhere, across all units, ensuring you run your business effectively
- Data Central's mobile-friendly reporting tracks store performance data, forecasts demand for high-traffic events, and delivers reliable actionable insights that can be accessed anywhere

Existing Data Central users love utilizing our “Activity Feed” to manage real-time alerts of uncompleted tasks that are disrupting the workflow and to make informed management decisions on the fly
